Professional Summary

Motivated and enthusiastic BCS graduate with a completed AIML course and strong interest in Artificial Intelligence, Machine Learning, and Data Science. Skilled in Python, SQL, Machine Learning, and data analysis. Developed academic and personal projects using Machine Learning and Python. Quick learner with good problem-solving skills, looking for an opportunity to start a career in the IT industry and apply my technical skills in a professional environment.

Technical Skills

Programming & Tools: Python, **SQL**, Excel, Git, **GitHub**, Jupyter Notebook
Data Science & Analytics: Data Collection, Data Cleaning, Data Preprocessing**, EDA**, Feature Engineering .
Machine Learning: Supervised & Unsupervised Learning, Classification, **Regression**, Clustering, Model Training & Evaluation .
Artificial Intelligence & Deep Learning: CNN, Image Classification, Medical Image Analysis, Data Augmentation, Computer Vision
Libraries & Frameworks: Pandas, **NumPy**, Scikit-learn, TensorFlow, Matplotlib .
Databases & BI: MySQL, PostgreSQL, **Power BI**, Tableau

Internship Experience

Rubixe (AI & Automation Solutions) -AI & Data Science Intern Aug 2026 - Present

- Worked on end-to-end data science projects from data collection and cleaning to model deployment.
- Conducted EDA to identify trends, correlations, and actionable business insights.
- Built and evaluated machine learning models for classification and regression using Python and SQL

Projects

Chest X-Ray Disease Detection (Deep Learning)

- Developed a Deep Learning-based Chest X-Ray Disease Detection system to identify diseases from chest X-ray images.
- Preprocessed and prepared X-ray images using Python and image processing techniques for model training.
- Implemented a CNN (Convolutional Neural Network) model to classify chest X-ray images based on learned patterns.

Movie Recommendation System(Machine Learning)

- Developed a Movie Recommender System using Python and Machine Learning to recommend movies based on user preferences.
- Implemented Content-Based Filtering using movie features such as genres, keywords, cast, and overview.
- Used Pandas, NumPy, Scikit-learn and Streamlit for data processing, model development, and web application deployment.
- Integrated the TMDB API to fetch movie posters and display recommended movies in an interactive interface.

Education

B.sc(computer Science) : Savitribai Phule Pune University **CGPA** : 8.45 **year :** 2026
